BEAUTY CUTWEB

The easy and cheap solution
to **manage nesting and cutting**
through the Internet

CUTWEB allows you to manage **nesting** and **cutting** easily, quickly and safely by operating exclusively **through the Internet**.

- ✓ No need to install new software and no maintenance or update fees: the latest version is always on line.
- ✓ The communication with customers and suppliers becomes easier, faster and cheaper.
- ✓ Full and extensive help for self-learning.
- ✓ Collects in a single application all the data related to nesting and cutting keeping them constantly updated.
- ✓ Provides quickly customisable reports.

With **CUTWEB** you can...

...coordinate subcontractors

When some production stages are delegated to third parties or to foreign branches, problems of communication, control, and production priority may arise. **CUTWEB** is the solution to these problems.

- ✓ One single application to communicate with all the suppliers and to manage all the needed data formats.
- ✓ The progress of production can be checked at any time.
- ✓ Accurate control over the quantity of material used.
- ✓ The cutting departments receive the layouts calculated on the materials that they actually have to cut, gaining efficiency and saving time and resources.
- ✓ Reduces to zero the distance between the headquarters and the production sites.

...add value to the products

Companies that produce materials, both synthetic and natural, operate in a highly competitive market where products are hardly differentiated.

CUTWEB offers to these companies a number of opportunities to add value to their products.

- ✓ By browsing the catalogue of the available materials through **CUTWEB**, customers choose those that best fit their needs.
- ✓ By including in the product the access to our on-line nesting service, customers will be ready to cut as soon as the material arrives at their premises.
- ✓ Many benefits can be achieved:
 - the product differentiates
 - customer fidelity grows
 - new customers can be reached through the Internet
 - a new variable shows up in competition: value added services.

...improve relations with customers

Who usually operates as a subcontractor finds in **CUTWEB** the perfect solution to gain efficiency, quality, productivity and to boost the communication with customers.

- ✓ All the data transmission is managed by a unique interface that automatically handles the needed data format translations.
- ✓ The communication relies on *safe* data sharing to save time, increase the quality and leverage the power of the Internet.
- ✓ Prepare accurate cost estimations in a few clicks.
- ✓ Allows to receive and manage orders from the Web.
